

Be Part of the Geriatric Emergency Department Dashboard

All accredited Geriatric Emergency Departments (GEDs) now have the opportunity to contribute to the GED Dashboard.

ABOUT THE DASHBOARD

This online tool is a rich source of information that will help your Geriatric Emergency Department and others around the nation view information about the care of older adults and visualize key metrics through innovative, actionable ways.

Only those who share information can access the Dashboard!

WHAT DOES THE GED DASHBOARD DO?

Showcases the impact of your GED care interventions through metric visualization

Displays clinical outcome measures relevant to your GED to support high-value care

Helps GED leaders identify areas for operational improvement

WHY PARTICIPATE?

- Interpret complex information via easy-to-read Dashboard graphs and graphics
- Support the national movement to establish the GED model as best practice
- Contribute to the collective body of knowledge that will help older-adult patients and improve GED performance
- Visualize metrics to support GEDs with internal stakeholder reports, resource allocation, and process improvement for older adults

KEY DASHBOARD METRICS

- Emergency department encounters by age group
- Percentage of patients aged 65+ years who are boarding for more than 4 hours
- Inpatient admissions from the ED for patients aged 65+ years
- All-cause 30-day same-ED revisits for patients aged 65+ years
- Mean length of stay for patients aged 65+ years
- Number of select screenings performed in accordance with the GED model
