

Evolving the standard of care

The role of Geriatric Emergency Departments

Geriatric Emergency Departments (GEDs) are well-suited to cater to the needs, dispositions and presentations that older adults have. GEDs provide standardized, integrated care that can reduce system costs and drive better, healthier outcomes, often via the integration of best practices for older adults into an existing ED.

Why GEDs?

Lower return visits

Recent data affirms that readmissions, as well as returns to the emergency department for high-risk populations are lower in communities with GEDs.

Greater market share

GEDs enable health systems to demonstrate their commitment to excellent care to the community, while also allowing emergency departments to better manage existing patients to create space for patients needing a high level of care.

Improved patient experience

According to emerging research, older adult patients who receive comprehensive geriatric assessment and enhanced transition of care services report higher patient satisfaction.

Better census management

Studies demonstrate that hospitals with GEDs have up to 16% fewer hospital admissions and a decreased inpatient length-of-stay for admitted older patients.

Higher staff morale

GEDs help staff know that they are doing an excellent job caring for their patients.

Become part of the GED movement.

Becoming a GED is a signal that your health system is committed to providing the best care possible to your community's older adults.

currently, there are:

400 GEDA accredited sites

44 states represented

11 prestigious health systems are GEDC members and accredited as a Geriatric ED

Current members include:

- Advocate Aurora Health
- Cleveland Clinic
- Dartmouth-Hitchcock
- Kaiser Permanente
- Mayo Clinic
- Northwell Health
- The Queen's Medical Center
- UHN
- University of California Health
- VA Healthcare
- Yale New Haven Health

Improve your geriatric emergency care with GEDA and GEDC.

	
<p>GEDA provides:</p> <p>1 Education</p>	<p>Join GEDA with the help of GEDC!</p> <p>✓ Access to online learning modules to educate & train interdisciplinary staff to deliver highest level GED care</p>
<p>2 Policy, Protocol & Care Processes</p>	<p>✓ On-demand webinars with top leading healthcare professionals</p>
<p>3 Quality Improvement</p>	<p>✓ Access to all-new geriatric research library</p>
<p>4 Better Outcome Measures</p>	<p>✓ Consulting engagements and bootcamps</p>
